Turner Engine Control Solutions Company Profile

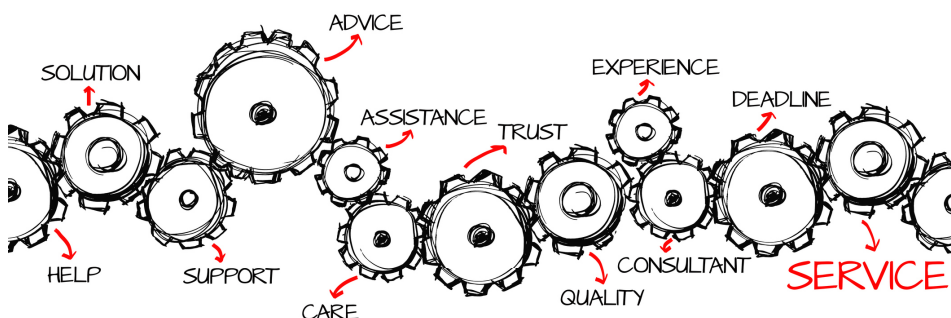

Company Profile

About Us

Turner Engine Control Solutions (Turner ECS) is an official Woodward Channel Partner with responsibility for sales and service across Europe and the Middle East.

Maintaining an extensive inventory of Woodward controls and genuine spare parts, we provide a full range of services from engineering, design, installation and commissioning to aftermarket repair and maintenance support services for engines, turbines and power management systems.

One of our key competences is fitting new control, protection and actuation solutions on existing installations. This includes software and hardware design, documentation, parts procurement, assembly, factory acceptance and on-site testing.

Recognised Retrofitter

As Woodward Recognised Engine Retrofitter (RER) and Woodward Recognised Turbine Retrofitter (RTR) we have the specific knowledge, tools and experience to offer extensive solutions for generators, compressor, pumps, and propulsion applications as well integrated systems.

We can manage turnkey projects combining Woodward controls, actuation and valve technologies with other brands as required, delivering reliable solutions both onshore and offshore, around the world.

Genuine Parts

As a Woodward Channel Partner we stock and sell a range of Woodward products including electronic controls, protection relays, actuators and valves for all types of engines, turbines and power management systems. Complementary to the Woodward range of products we also specialise in voltage regulators.

SERVICES

- Governor Overhaul
- Maintenance & Repair
- Project Engineering
- Cabinet Assembly
- Technical Support
- Field Service & Training
- Parts Sales
- Exchange Stock

PRIME MOVERS

- Diesel Engines
- Gas Engines
- Steam Turbines
- Gas Turbines

APPLICATIONS

- Generators
- Compressors
- Pumps
- Propulsion
- Switchgear

INDUSTRIES

- Oil & Gas
- Petrochemical
- Process Plants
- Marine Propulsion
- Power Generation
- Onshore/Offshore

Company Profile

Electronic Repair

At our in-house facility we repair and test Woodward electric controls (e.g. load sharing and speed controls) applied on a wide variety of prime movers used in oil & gas, petrochemical, process, marine and power generation markets.

Turner ECS offers the following electronic services:

- Repair of all analog Woodward controls
- Repair of digital Woodward controls
- Testing of obsolete analog/digital controls and Micronet/Netcon cards
- Cleaning, calibration and factory testing of Micronet/Netcon cards

Mechanical Repair

From our purpose-built workshops located in Hoofddorp in the Netherlands and Newcastle under Lyme in the UK, we provide a comprehensive overhaul and repair service for mechanical governors.

We are fully equipped with the latest calibrated test benches, special tools, test simulators and software and we maintain an extensive database of drawings and test procedures.

Our service engineers and technicians are factory trained with many years of experience on all types of Woodward products. Besides Woodward we have the knowledge and experience to repair Heinzmann actuators, RE Governors, Diesel Kiki, Zexel and Yanmar governors.

Field Service

Turner ECS provide a 24 hour service, 365 days a year to support our customers in the field. Our service team are fully factory trained on Woodward governors and control products ranging from mechanical governors to sophisticated digital controls systems.

Our field service and commissioning engineers are VCA and offshore certified and travel worldwide to provide support.
